

Samuel Lukens Goldberg

sam.goldberg@earth.miami.edu | www.samgoldberg.org

Assistant Professor

Department of Marine Geosciences
Rosenstiel School of Marine, Atmospheric, and Earth Science
Core Faculty Member, Frost Institute for Data Science and Computing
University of Miami, Miami FL

EDUCATION

Massachusetts Institute of Technology, Cambridge MA *September 2021*

Ph.D. in Geology

Thesis title: Tectonic and climatic controls on continental river systems

Harvard University, Cambridge MA *May 2016*

A.B. in Earth and Planetary Sciences, secondary field in Physics

Thesis title: Sea Level Change Since Last Glacial Maximum

PROFESSIONAL APPOINTMENTS

University of Miami

Frost Institute for Data Science and Computing

Core Faculty Member

January 2023-present

Department of Marine Geoscience

Rosenstiel School of Marine, Atmospheric, and Earth Science

Assistant Professor

January 2023-present

NSF Postdoctoral Fellow

July 2022 - December 2022

Postdoctoral Associate

November 2021 - June 2022

Massachusetts Institute of Technology

Department of Earth, Atmospheric, and Planetary Sciences

Postdoctoral Researcher

September 2021 - October 2021

Graduate research and teaching assistant

September 2016 - August 2021

PUBLICATIONS

Submitted

Goldberg SL, Holt AF. Characterizing the complexity of subduction zone flow with an ensemble of multiscale global convection models. *In review.*

Goldberg SL, Schmidt MJ, et al. Remote sensing reveals widespread extent of Amazonian dark earth. *In review.*

Published

Schmidt MJ, **Goldberg SL**, et al. Intentional creation of carbon-rich dark earth soils in the Amazon. *Science Advances*, 9(38), eadh849.

Stokes MF, Kim D, Gallen SF, Benavides E, Keck B, Wood J, **Goldberg SL**, Larsen IJ, Mollish JM, Simmons J, Near TJ, Perron JT (2023). Erosion of heterogeneous rock drives diversification of Appalachian fishes. *Science*, 380(6647), 855-859.

Stokes MF, Larsen IJ, **Goldberg SL**, McCoy SW, Prince PP, Perron JT (2023). The erosional signature of drainage divide motion along the Blue Ridge escarpment. *JGR Earth Surface*, 128(1), e2022JF006757.

Pan L, Milne GA, Latychev K, **Goldberg SL**, Austermann J, Hoggard MJ, Mitrovica JX (2022). The Influence of Lateral Earth Structure on Inferences of Global Ice Volume During the Last Glacial Maximum. *Quaternary Science Reviews* 290, 107644.

Goldberg SL, Schmidt MJ, Perron JT (2021). Fast response of Amazon rivers to Quaternary climate cycles. *JGR Earth Surface* 126(11), e2021JF006416.

In preparation

Goldberg SL, Stokes MF, Perron JT. Climate modulates the influence of rock type on bedrock river incision. *In prep.*

GRANTS AND FELLOWSHIPS

2022-2024	NSF Postdoctoral Fellowship (\$180,000)
2018-2021	NASA Graduate Student Fellowship (NESSF) (\$135,000)
2017-2018	Patrick Hurley Fellowship
2016-2017	MIT Praecis Presidential Fellowship
2015	Harvard University Center for the Environment Summer Research Grant

AWARDS

2020	EAPS Teaching Award
2016	Thomas Temple Hoopes Prize for Outstanding Senior Thesis

INVITED TALKS

University of Miami, Department of Marine Geosciences (May 2, 2022)
University of Miami Geotopics Seminar (August 27, 2021)

TEACHING EXPERIENCE

GSC 110 The Earth System (University of Miami) - Spring 2023. Introductory comprehensive geology course required for geoscience and marine science majors.

12.163/12.463 Geomorphology (MIT) – Teaching assistant, Fall 2019 (received EAPS teaching award). Advanced undergraduate and graduate course covering quantitative geomorphology and Earth surface dynamics. Taught lab sections, organized class field trip, mentored students with research projects, delivered class lectures.

MIT Teaching and Learning Lab – Teaching Certificate (includes three separate programs):

- Teaching Practice Certificate, Summer 2020. Four-week program in teaching methods, active learning, and class design.
- Subject Design Certificate, Fall 2020. Three-week program in subject design and assessment.
- Inclusive Teaching Certificate, Spring 2021. Two-week program in inclusive teaching and creating a welcoming classroom climate.

DEAPS Yellowstone (2017-2019) – Teaching assistant and co-organizer for a week-long trip to Yellowstone and Grand Tetons National Parks, as an introduction to geology and field experience for first-year students.

FIELD RESEARCH

Southern Appalachians (NC and VA) – Collected river sediment samples for cosmogenic nuclide measurements and measured channel geometry and sediment properties.

White Mountains, New Hampshire – Collected photographs for structure-from-motion photogrammetry of channel bed and bank morphology.

Newfoundland – Collected Paleozoic carbonates and Neoproterozoic siliciclastic samples for laboratory analysis.

Death Valley/Mojave Desert – Measured stratigraphy and collected samples from Cambrian carbonate strata for laboratory analysis.

STUDENTS MENTORED

Luiz Leal Gomes (MSRP 2019 research intern, summer research program for underrepresented students). *Remote detection of anthropogenic dark earths using fully convolutional neural networks*. Currently Supplier Quality Analyst at Embraer.

Joshua Himmelstein (Spring 2020 research assistant). *Classification and segmentation of remote sensing imagery for detection of land use and vegetation patterns in the Amazon*. Currently Ph.D. student at UNC.

Pratistha Timilsina (Fall 2021 research assistant) *Applications of artificial intelligence to remote sensing and archaeology*.

DEPARTMENT/UNIVERSITY SERVICE

MSRP Application Reviewer (2019-2021) – Reviewed applications for an MIT summer research program for underrepresented undergraduate students from other universities.

EAPS Student Advisory Council (ESAC) Representative (2019-2021).

Department field trip (2018) – Co-organized department-wide fall weekend field trip to western Massachusetts.

Department field trip (2017) – Co-organized department-wide weeklong field trip to Newfoundland.

OUTSIDE OUTREACH

Frost Museum of Science, Miami (2021-present) – Assisted with content development for new exhibit about the ice age history of Florida. Presented hands-on outreach activities at Earth Day celebration.

National Center for Science Education (2018-2021) – Volunteered with development and testing of informal science activities for climate change and evolution.

Duck and Hover (2017-2019) – Served as mentor for teams of high school students tackling an engineering design challenge in an annual day-long event at the Boston Museum of Science.

Boston area science festivals (2016-2021) – Public outreach and engagement at a number of events in the greater Boston area.
